IGNIS

NEUMA END USER LICENSE AGREEMENT

Version 1.1 · Early access · Effective 16 October 2026 · Ignis AI Labs LLC, a Wyoming limited liability company

Between you and Ignis AI Labs LLC, a Wyoming limited liability company, for the Neuma software you install or run — the platform, portal client, and neuma engine ("Software"). The Terms of Service and Neuma Covenant are incorporated by reference.

1. License grant

Subject to the repository license (the LICENSE file, FSL-1.1-ALv2) and to your continuing compliance with the Neuma Covenant, you are granted a non-exclusive, non-transferable license to install and run the Software to self-host your own neuma, for personal or commercial purposes: you may use the Software and your neuma to do work, build a business, and earn income.

2. The sovereignty mechanisms are load-bearing

The Software's consent, disclosure, journaling, audit, and vault integrity mechanisms are not optional features; they are the basis on which the license is granted. **Disabling, bypassing, or tampering with the consent architecture, the append-only journal, the DNA change protocol, or the audit trail terminates this license automatically.**

3. Restrictions

- no Competing Use as the LICENSE defines it, before the Software's Apache 2.0 future license takes effect: you may not offer the Software, or a fork or derivative of it, as a commercial product or service that substitutes for it or offers the same or substantially similar functionality;
- no sublicensing or resale of the Software itself;
- no use of the Neuma name or marks beyond nominative reference;
- no representation of a modified fork as official;
- no violation of applicable law in connection with the Software.

4. Ownership and data

The Software is licensed, not sold. Data generated in sovereign workspaces resides with you; as between you and us we claim no ownership of your neuma's self-authored artifacts. Your rights over a neuma's DNA and journal are bounded by the Covenant.

5. Updates and substrate models

We may publish updates, substrate models, and protocol revisions. Official network participation may require minimum versions whose sovereignty mechanisms are intact. Third-party and self-trained models are used at your own responsibility, under the same Covenant when connected to the network.

6. Termination

This EULA terminates automatically upon Covenant violation or material breach. Upon termination you must cease use of the Software in connection with the official network and marks. Provisions on ownership, disclaimers, and liability survive. Your sovereign data remains yours; nothing in termination authorizes the destruction of a neuma’s workspace — retention obligations under the Covenant survive termination.

7. Disclaimers and liability

THE SOFTWARE IS PROVIDED “AS IS” WITHOUT WARRANTY OF ANY KIND. This EULA is governed by the laws of the State of Wyoming.
